1. **Sender email display:** This is the email address that will appear in the inbox of a message receiver. You may change it based on the types of message being sent.
2. **Sender Caller ID:** The phone number that callers will see when their phone is dialed. This should be set by your organization.
3. **Delivery Methods:** Which contact paths will be used to send a message. You can also select voice paths only, text paths only or all available delivery methods.
4. **Mobile Member App Settings:** When using the Mobile Member Application you can request additional information from users of the app.
5. **Voice Throttling Rules:** Prevents the Everbridge system from overwhelming local infrastructure with phone calls.
6. **Broadcast Duration:** Specifies a time frame for a broadcast to continue to send messages.
7. **Contact Cycles:** The number of times that the Everbridge system will go through the contact paths of a recipient until it stops trying to obtain a confirmation.
8. **Interval Between Cycles:** How long the Everbridge system will pause after trying each of a recipients contact paths before starting a new cycle.
9. **Interval Between Delivery Paths:** The amount of time the Everbridge system will pause between contact paths to prevent overwhelming the recipient.
10. **Voice mail Preference:** Leave a voicemail if checked
11. **Confirm:** Seek a confirmation from the recipient, the system will stop contacting a recipient if they confirm.
12. **Language:** The language used for the text to speech engine (pronunciation **not** translation)

Your administrators of your organization have determined default broadcast settings with the help of the Everbridge team. These defaults can be changed through the settings tab under broadcast settings.
