

# Incident Significant Events

Event Boards are used to capture and display information pertinent to overall operations. They serve as bulletin boards as well as historical records of events associated with a disaster or response.

## Incident Significant Events

2019 ARCC Training

Flooding - Braun Rd near Loop 1604

Update Record

Map

Updated In the Last 30 Minutes Msg ID#: 1

The Low Water Crossing at Braun Road 1300' Northeast of 1604 is inundated and impassable. Bexar County Sheriff's Dept has been dispatched to close access and redirect traffic.

HanksBarrett1636 as ARCC Ops - Operational Support Personnel at 12:45 hrs on 05/01/2019

1. To create a new record click the green **+ Create** button.
2. Updating a record is as easy as creating one. Individual entries are frozen in 'read only' mode meaning that you can't change what has already been entered. However, updating the record will add your new entry to the existing record.
3. Each entry, whether new or an update, will be tagged with the WebEOC Username and Position of the person who made it as well as the Time and Date when it was entered.
4. WebEOC has a built-in mapping system that allows each record to be shown on an interactive map. Clicking this will open the map directly to the location of the record.
5. If a photo is attached to the record it will display directly on the record in the list display. Clicking on the picture will open a new window with the picture and record in an easily printable (PDF) format.

## Incident Significant Events

1. To create a new record click the green **+ Create** button.

Event Mapping

**1** Mapper Label:

**2** Address:

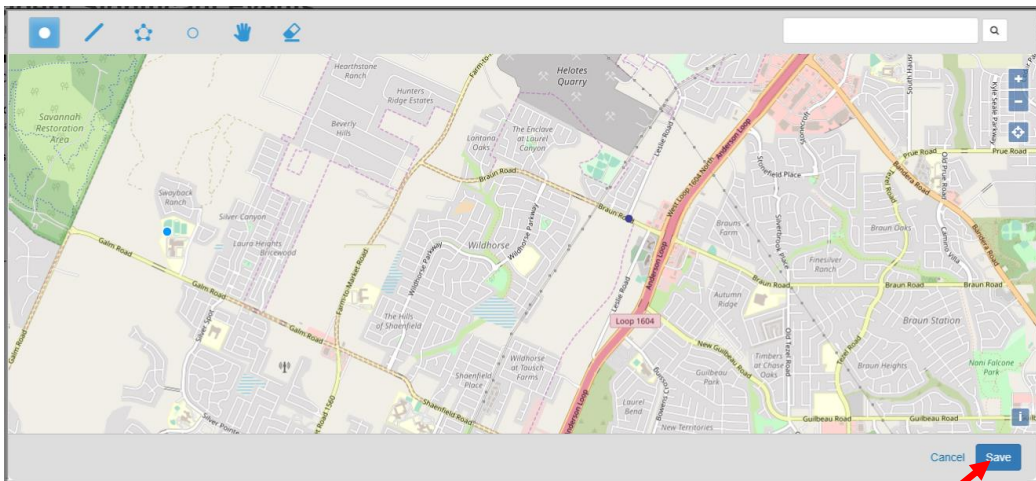

\*Click to Map:  **3**

**\*Mapping Help**  
**The Mapper Label field gives the map icon for your entry its label.**  
 There are 2 ways to add your record to the map:  
 1. Enter an address. At a minimum enter the street number, street name, city, and state. Then click on the 'Map' icon. It should take you straight to the address.  
 2. Skip the Address field and click on the 'Map' icon. It will open the map and allow you to place a marker by clicking on the appropriate place on the map.  
 Once your marker is on the map click 'Save' in the lower-right of the map screen and it will take you back to the input. A green checkmark next to the 'Map' icon means that you have successfully mapped your record. Now complete your entry.

1. The label that will display on the map over the icon identifying your record
2. Enter an address. At a minimum enter the street number, street name, city, and state. Then click on the 'Map' icon. It should take you straight to the address.

-- OR --

3. Skip the Address field and click on the 'Map' icon. It will open the map and allow you to place a marker by clicking on the appropriate place on the map.

4. Once the dark blue dot is where you need it, click the Save button. This will bring you back to the Input where you will route and save the record.

# Incident Significant Events

The Incident SigEvents Board is a standard Event Board. It is more general than section or discipline events boards like EOC Events, Police Events, Fire Events, etc. For most incidents all events get entered into SigEvents. However, large-scale incidents (i.e. hurricanes) result in large-scale responses that require the distribution of events across multiple boards to keep from inundating any single one.

Your position determines what boards you have access to. Listed in the routing section of your input will be all of the Event Boards your position has been assigned. If your record belongs in multiple events boards check the appropriate boxes here.

### Event Record Routing

- Position Log
- Regional Events
- Incident Significant Events
- Statewide Incident Significant Events (TDEM)

**Cancel**

Once you click a box to route the record to the appropriate Event Board(s) a large green Save button will appear. Click that button and your record will be saved.
